Announcing IntroDPS /
Get up and running <u>faster</u> with your own institutional digital preservation program!

If you are new to digital preservation or want to improve your skills, consider the IntroDPS, a digital preservation training package from the ARCHIVESCANADA Digital Preservation Service (ACDPS). This package consists of access to a hosted Archivematica instance with AtoM, institution-specific interactive online training sessions and a series of hands-on practical exercises. An unlimited number of users from the participating institution will have access to the training materials and hosted software for a period of three months.

At the end of three months, you will have gained a better understanding of OAIS, digital preservation workflows, preservation metadata and format-specific preservation planning.

> **No additional commitment is required and you can walk away at the end, more knowledgeable and better prepared to deal with one of the most pressing issues confronting heritage organizations: preservation of accessible, authentic and reliable digital records.**

Of course, you are also welcome at any time to leverage your new knowledge and transition into ACDPS Tier 1, Tier 2 or Tier 3.

You **CAN** do this! <u>No previous digital preservation experience is required</u>; however, training can be tailored to meet the needs of more advanced users if desired. Your training site will be up and running quickly and you will start performing a broad range of digital preservation activities starting with your very first training session.

Choose one of the following packages:

IntroDPS level 1: cost per institution $1,950
Duration: three months
Includes: 1 hosted instance of Archivematica and AtoM set up exclusively for the participating institution; an extensive corpus of sample holdings for training and testing purposes; and <u>6 hours</u> of interactive online training, including hands-on practical exercises.

IntroDPS level 2: cost per institution $3,900
Duration: three months
Includes: 1 hosted instance of Archivematica and AtoM set up exclusively for the participating institution; an extensive corpus of sample holdings for training and testing purposes; **ability to upload institutional holdings to Archivematica** for training and testing purposes; **500 GB of temporary storage** for institutional holdings; and <u>9 hours</u> of interactive online training, including hands-on practical exercises.
